(54) Title: SYSTEM AND METHOD FOR DISPLAYING PRICE MODELING DATA

(57) Abstract: The present invention allows a user make filter, zoom, and roll up selections and apply those selections to a desired price modeling data set. As such the present invention provides a system configured to suitably display price modeling data having a data selection module for selecting at least one subset of the price modeling data, a data aggregation module for aggregating at least one subset of the price modeling data, and a display module configured to display at least one of the at least one selected subset and the at least one aggregated subset of the price modeling data.
